[perl - How do I get a list of installed CPAN modules ...](#)

stackoverflow.com/questions/115425
It's worth noting that perldoc perllocal will only report on modules installed via CPAN. If someone installs modules manually, it won't find them.

[How To Install Perl Modules Manually and Using CPAN](#)

www.thegeekstuff.com/2008/09/how-to-install-perl...using-cpan-command
perldoc is exactly what you should not use. It will only work on Unix-like systems, and requires modules to be installed (HTML::Entities) before you can even install it.
